

To Scale In the Cloud, Organizations Need Cloud Identity Controls

96% OF DECISION-MAKERS HAVE FACED A SECURITY INCIDENT IN THE CLOUD

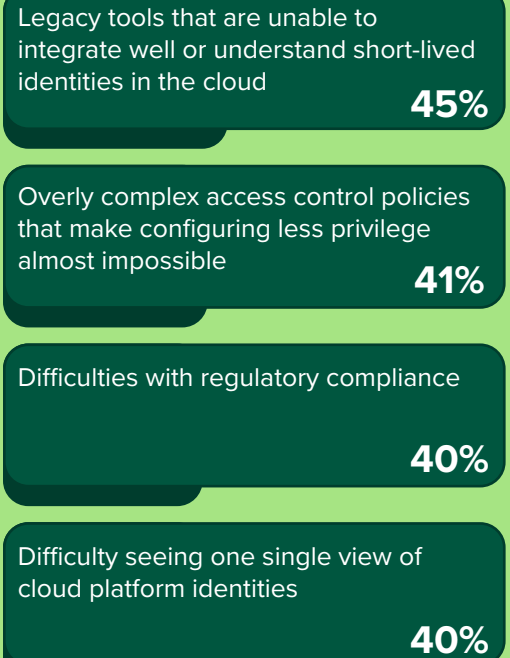

79% of decision-makers note that the increase in cloud migrations requires a new set of security solutions.

Most common security incidents decision-makers face include:

INCREASED PUBLIC CLOUD USAGE

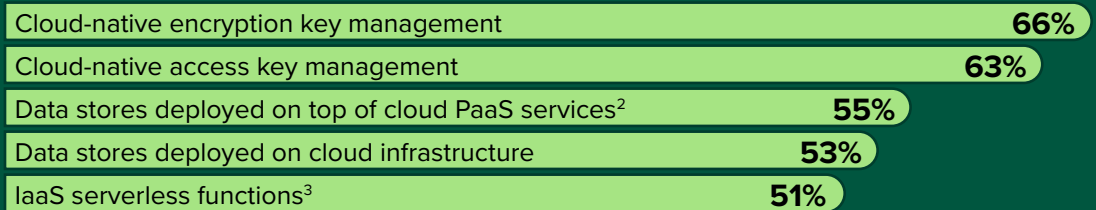

98% of decision-makers face the following cloud security challenges:

CIG/CIEM SOLUTIONS HELP DECISION-MAKERS EFFECTIVELY MANAGE CLOUD SECURITY¹

54% of decision-makers are already investing in a CIG/CIEM solution.

These solutions should understand and detect changes in identity access for many different resources:

CIG/CIEM SOLUTIONS BRING WIDE-RANGING BENEFITS

Cloud identity management enables firms to continue successfully scaling in the cloud.

Top benefits include:

Base: 154 cloud security decision-makers in North America

Source: A commissioned study conducted by Forrester Consulting on behalf of Sonrai and AWS, January 2022

¹ CIG/CIEM: cloud identity governance/cloud identity entitlement management.

² PaaS: platform as a service.

³ IaaS: infrastructure as a service.
